

## Our Commitment

Dedication, value, tradition, health and beauty. Five core values of esSpa Hungarian Organic Spa + Salon. Visiting a spa or salon is much more than a day of relaxing or a new haircut. esSpa understands time is precious, money hard earned, and a stress-free experience is key. We are humbled by our awards but most of all, honored by the acknowledgment of dedication in providing the highest-quality spa and salon services. We are dedicated to the sustainable restoration, protection and maintenance of healthy skin and hair – and to you.

“Everything we do is focused on enhancing your health and beauty from head to toe – inside and out.”

Sustainability is the conscious and proactive use of methods that meet the needs of the present while positively contributing to the regenerative ability of future generations to meet their own needs. esSpa recognizes that sustained health for human beings is intricately tied to a healthy and thriving ecosystem. Therefore, we approach sustainability in a broad manner with the intention to encourage increased awareness and actions in response to the need for an earth friendly lifestyle. Our goal is to encourage actionable and scalable decisions that positively impact people and planet towards regenerating, rather than sustaining, our individual wellbeing.

1. We recognize that consciously and continuously managing our social and environmental relationships is key to success. We support and encourage any action that results in a positive impact on long-term vitality.
2. In the spirit of positive reinforcement, we support continual improvement through applying existing and emerging developments in sustainable principles, practices, and technologies.
3. We recognize that striving to adopt best practices may require intermediary solutions as necessary steps on the path to a sustainable future.
4. We support transparency by focusing on efforts that are reliable, replicable, and provide measurable outcomes.
5. We believe that esSpa provides an important link between the social and environmental efforts of sustainability. Our focus on personal wellbeing supports lasting vitality for people and the planet and believe that personal awakening is key to inspiring actions that support a sustainable future.
6. We recognize that consciously and continuously managing our environmental and social relationships is key to our success.
7. We understand that “green” principles, products and technologies are continually evolving. We intend to respond to these developments and apply “best practices” that have a positive impact on our employees, our customers and our local and global community.
